

Artificial Intelligence Statement of Use Declaration

FINAL WEB TECHNOLOGY PROJECT: AgriShop

Kwizera Olivier

ID:47922027

On December 18th December 2025

Artificial Intelligence Statement of Use Declaration.

During the development of the AgriShop project, I applied artificial intelligence tools(ChatGPT and Google Gemini) in a supportive manner. Conceptual clarity and understanding of technical documentation, as well as overall advice on the approach to debugging and web development and database design, were used as AI assistance.

Database schemas, system logic, and all application code, as well as the database's implementation decisions, were all individually designed, written, tested, and deployed. The artificial intelligence devices were not applied to the task of directly producing or replacing the assessed work, but to facilitate the understanding and increase the efficiency of development.

The final project is based on my personal technical work and knowledge, and meets the relevant academic standards of integrity and assessment.
